

PermaPro Concrete Detergent

PRODUCT DESCRIPTION :

PermaPro Concrete Detergent is a penetrating concrete cleaner and renovator that quickly dissolves lime deposits, scale, rust, mortar, algae and mud stains from concrete interior or exterior without the dangers or fumes of raw Muratic acid. Also insures better bonding of spray textures and overlay applications.

HOW TO USE:

Polyethylene or similar plastic sprayers and buckets are recommended for application. Do not use Nylon brushes.

1. Depending on the type of stain or soil, PermaPro Concrete Detergent may be used full strength or diluted up to 1:3 with water.
2. Apply PermaPro Concrete Detergent by brush, spray or dipping. For spray, use a very coarse spray pattern to avoid inhaling the mist and causing over spray.
3. Allow it to soak for several minutes. Agitate heavy soil or stains with a stiff broom, then rinse thoroughly with water. Repeat application may be required on some stains.

BENEFITS:

- The safe replacement for Muratic acid. PermaPro Concrete Detergent produces no harsh or irritating fumes even in interior areas where raw Muratic acid produces choking and corrosive fumes.
- Will not burn concrete -- PermaPro Concrete Detergent can be used at full strength on difficult stains and will not degrade the concrete surface or interfere with acid staining of the concrete.
- Will not attack most metals. Most of the metal encountered on the job will be either steel or aluminum. PermaPro Concrete Detergent is highly inhibited against attack on these metals. It will brighten copper and brass, but will not corrode them if washed off. It should not be used on magnesium, galvanized metal or stainless steel. Test plastic laminates before using PermaPro Concrete Detergent on them.

PROPERTIES and STORAGE :

Type : Penetrating acidic detergent renovator.
Color : Blue
Ph : 0,5—1
Odor : Pleasant
Flammability : Nonflammable
Storage : One year in original packaging if kept above freezing.
Packaging : 5 liters.
Coverage : 1 liter = 5 m² / 15 m²

WARNING :

Corrosives to eyes and may irritate the skin. Gloves and protective clothing are always recommended for maximum protection.
